of style and individuality.*

VAIL Majestic Copper

from Custom-Bilt Metals

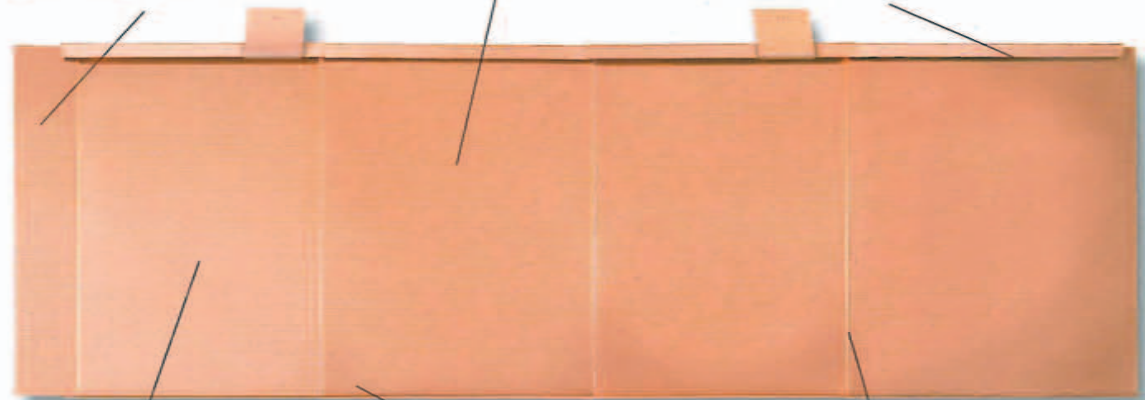

When it comes to your home, you want everything to be perfect, right down to your roof. When you choose *VAIL Majestic Copper* shingles from Custom-Bilt Metals, your home becomes a gracious example of your good taste.

VAIL Majestic Copper shingles create a visual effect that is truly distinctive. Their solid copper construction means that they can easily withstand nature's harshest conditions, including extreme temperatures, heavy snow and high winds. With a lifetime warranty behind it, you can rest assured that your new *VAIL Majestic Copper* roof will provide years of beautiful performance.

- Interlocking tab system creates waterproof channel and aligns panels during installation.
- Solid copper construction provides exceptional resistance to high winds, snow loads and foot traffic.
- Patented interlocking system locks panels securely in place on all four sides.

- Lightweight panel eliminates costly structural upgrades.
- Patented hem design prevents wind uplift and moisture penetration.
- Folded seams create classic interlocking shingle design.

It's at the very top of elegant roofing design.

VAIL Majestic Copper gives your roof an attractive, traditional look that complements nearly any style home. It naturally changes color from the brilliance of new copper to the distinctive, elegant patina of aged copper. How quickly the color deepens depends on the amount of sunlight and moisture it receives, as well as your home's geographic location and elevation. But no matter how long the aging or the location of your home, a copper roof will provide you with one-of-a-kind, ever-evolving beauty.

It's enduring performance.

VAIL Majestic Copper is fabricated from 16-ounce solid copper coil. An exclusive manufacturing process adds dimension to the panels, improving the strength of each shingle. The panels are lightweight and install easily over most existing asphalt roof material, eliminating costly tearoffs.

Copper

Custom - Bilt Metals strives to accurately reproduce the images of shingles in this literature. However, due to manufacturing differences, the limitations of graphic reproductions and the variations in natural exterior lighting, actual shingle colors may vary from the images you see reproduced in this literature. For this reason, it is important to see either a display or actual sample of the product before making a final color selection.

Naturally Aged Copper

Find out more.
