

roofing, an aluminum roof system's performance does not degrade over time. The warranty is transferable to a new owner for 40 years from the date of installation.

Q: How will a Country Manor Shake roof hold up in a hail storm?

A: Country Manor Shake is formed from aluminum sheet that has a minimum tensile strength of 26,000 pounds per square inch. Its deeply formed face gives it a realistic appearance and adds strength and rigidity. Minor hail storms usually won't cause any damage to the roof. Naturally, severe hail storms with large hail stones can cause indentations. However, minor dents that might occur will not be noticeable, hidden in the shingles' natural wood grain pattern. Country Manor Shake is warranted not to leak as a result of hail perforation. This is a significant warranty, since other roofing products on the market have been known to split, crack, or blow away in hail storms, causing damage not only to the roof itself, but also allowing water to enter the home to cause interior damage. Country Manor Shake has passed UL-2218 Level IV (the highest rating) Impact Resistance Testing. Homeowners who choose a Country Manor Shake roof may be eligible for a discount on their homeowners' insurance.

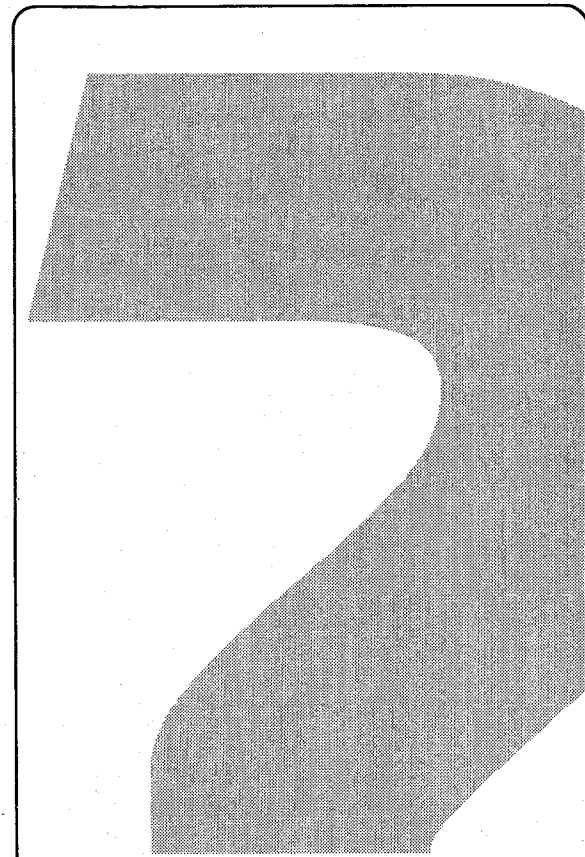

Only Country Manor Shake Roofing Offers All of These Features!

- **Long-Lasting Durability**
Won't rot, warp, split, curl, deteriorate, or need continual replacement like wood, asphalt, and other conventional roofing products.
- **Fire Resistance**
Won't burn or support combustion.
- **Hail Protection**
Warranted not to leak as a result of hail perforation; UL 2218 Class IV rating.
- **Wind Resistance**
Country Manor Shake panels interlock on all sides for maximum wind resistance. Properly installed, Country Manor Shake is warranted to resist winds up to 120 mph.
- **Light Weight**
At less than 50 pounds per 100 square feet, Country Manor Shake will not burden a building's structural frame members in reroofing applications.
- **Additional Insulation**
The air space created between Country Manor Shake and the roof deck will help keep attics cooler in summer, and Country Manor Shake won't hold heat like wood or asphalt shingles.
- **Lifetime Roofing Warranty**
Backed by an unequalled lifetime warranty, Country Manor Shake will outlast any other roof. Country Manor Shake also features a Fade Resistance Warranty, which helps assure your roof will look as beautiful in the future as it does the day it's installed.

Homeowners Ask Most About

Country Manor Shake

from

PERFECTION
The Very Best in Building Products

Country Manor Shake roofing is a truly unique product: engineered to last a lifetime, built to outlast ordinary roofing materials, and designed to offer you, the homeowner, long-lasting beauty, protection from the elements and a long-term investment in your most prized possession - your home.

To make your selection easier as you consider different roofing products, here are answers to the most frequently asked questions about Country Manor Shake roofing.

Q: Why should I make the investment in a Country Manor Shake roof?

A: There are two reasons why you put a roof on your home: the protection it provides and the aesthetic improvement it makes to your home. Country Manor Shake roofing meets both these needs beautifully. No other product on the market offers the protection from wind, rain, fire, hail, snow and ice like Country Manor Shake. And, no other product available today can provide the elegant appearance of hand-split cedar shakes while offering these protective features. Country Manor Shake is a one-time investment that will increase the value of your home and offer a lifetime of freedom from ongoing maintenance worries and costs. Over the long run, your investment in Country Manor Shake will pay you back by eliminating the need to ever reroof again.

Q: Is Country Manor Shake noisy when it rains?

A: No. In fact, homeowners are often surprised that Country Manor Shake is as quiet in a rainstorm as their previous roofs. If noise from rain is audible inside the home before Country Manor Shake is installed, it will not necessarily be eliminated. However, Country Manor Shake will not create additional noise on a roof that was quiet before the installation.

Q: Can I walk on my Country Manor Shake roof?

A: Yes, with care (as with any quality roofing product). Country Manor Shake panels are

made from flat aluminum sheet which is formed into its final shape. It actually takes 184 square feet of aluminum to make enough Country Manor Shake to cover a 100-square-foot area. The forming process used to make the product gives added strength and rigidity; therefore occasional trips to the roof for chimney or other types of home maintenance should pose no problem. Contact your Perfection Dealer for details on how to properly walk Country Manor Shake. One major benefit of the product is that, unlike other products, Country Manor Shake does not become brittle and less walkable as it ages. For roof areas with unusually high traffic, foam inserts are available for added walkability.

Q: Is a Country Manor Shake roof energy-efficient?

A: Aluminum reflects the majority of the sun's rays, so it doesn't retain as much heat as wood, asphalt shingles, tile, or cement. This means your Country Manor Shake roof will not pass the sun's heat into your attic, reducing the load on your air conditioner in the hot summer months and saving you energy dollars. Studies have shown aluminum roofing to reduce attic heat gain by as much as 34% - over the years, these savings really add up to make a difference in the environment and your energy budget.

Q: Do I have to remove my present roofing before Country Manor Shake is installed?

A: In many applications, Country Manor Shake can be installed over the previous roofing, helping to prevent the cost and mess of a tear-off. The lightweight aluminum does not add any significant additional weight to the roof, allowing it to be installed directly over asphalt, fiberglass or low-profile wood shingles. Check with your local dealer for more information.

Q: How long will Country Manor Shake roofing last?

A: Because it is made of aluminum, which is a stable, inorganic material, Country

Manor Shake roofing is free from the drying, splitting, curling, peeling, and flaking problems that plague conventional roofing products. Aluminum roofing has been used in agricultural, industrial and residential applications for over 70 years with outstanding performance.

Q: How good is the paint finish on the Country Manor Shake roof?

A: The finish used on Country Manor Shake is an exclusive Kynar 500* or Hylar 5000* coating, a two-coat, high-performance finish, which has exclusive weathering characteristics. The Kynar 500* or Hylar 5000* coating gets its durability and color retention from the strong bond of its formulation. During application, the molecules in the paint are chemically joined to form a strong coating that resists breakdown by ultraviolet rays and provides a long-lasting finish.

* Kynar 500 is a registered trademark of Atofina North America, Inc. Hylar 5000 is a registered trademark of Ausimont USA, Inc.

Q: What type of warranty is available with a Country Manor Shake roof?

A: Country Manor Shake has by far the best warranty in the business; a lifetime, non-prorated, limited warranty for the initial owner and a transferable 40-year limited warranty for all owners. Perfection warrants that Country Manor Shake roofing will not leak due to hail perforation, nor will it rust, burn, or support combustion. It will not split or crack due to cold weather and will not lose impact resistance with age.

Q: Since Country Manor Shake roofing is a long-term investment, is it worth buying if I don't plan to stay in my present home very long?

A: Because of the outstanding protection this product offers from fire, rain, wind, snow and ice, and because of its rich hand-split shake appearance, prospective buyers of your home will appreciate the added value that Country Manor Shake offers. As opposed to other types of
